We treat p al privacy regulatior

Data sto

The design usage without the submission ubmit personal data, but this choice will always be voluntary. We do not need to know your address, eye color or phone number. Why would we?

- When you start the app, you will receive an automatically generated key which serves as an alias for the identification of the app CharliesNames on your smartphone. This key is stored permanently and allows us to match all data correctly (e.g. if you are only looking for female names, we will store this information using your alias). We also permanently store your phone's language in order to be able to suggest suitable names to you and to make sure that the app runs in

your language. Apart from that we store your operating system (iPhone or Android) for the best possible usability.

- If you add a new baby name, we will obviously store it permanently in our database, but it will be stored anonymously.
- If you submit your surname to find out if it works with your baby's first name, we will store it until you delete it from our system. You can easily do that in the app under "Your data."
- As soon as you modify filter information, we overwrite the old information with the new filters and store them: baby's surname, country, language, sex, letters, name length. This is necessary for the suggestion of suitable names.
- If you c lping you find a r you are connec you in the app), y nnection was ma ved and when it nterrupt the cor e app under '
- As soo as well as the tim favorites list for nd to train th 142646 fact what makes you reset the ratings, they will become anonymous.
- In addition, we permanently store your app rating (one to five dummies) and your written feedback as we use this information to improve the app.
- Your click behavior will not be stored.
- The app CharliesNames does not require or store your IP address, however, the server on which CharliesNames is running will store so-called server log files. This includes your IP address, which is required for communication. We also use the server log files to

Store and/or access information on a device

Your personal data will be processed and information from your device (cookies, unique identifiers, and other device data) may be stored by, accessed by and shared with 141 TCF vendor(s) and 69 ad partner(s), or used specifically by this site or app.

Some vendors may process your personal data on the basis of legitimate interest, which you can object to by managing your options below. Look for a link at the bottom of this page or in the site menu to manage or withdraw consent in privacy and cookie settings.

Disclosure to third parties

We have deliberately decided against an ad-based business model so that we can offer you great usability and data privacy. We are not going to sell your data.

Measuring reach / statistics

We create internal statistics for ourselves from which we can gather every day e.g. how many name ratings were submitted, how many times the app was downloaded, how many active users we have, which search preferences are popular, with how many dummies the app is rated or which app versions are currently used in total. They tell us, for example, that our users are usually looking for names that have at least 3.8 and not more than 7.3 letters and that most of you are looking for boy names. These statistics are deleted daily. The conclusions we draw from the statistics are once more used for improving the app.

The app s ure reach independ mized in order to c ongst other thir

App auth

When dow mpted. Because w authoriza , for example, access your data. Pers r in other apps, too.

The only exception are in-app purchases. If you would like to support us financially (I am taking this opportunity to thank you very much), the app requires an authorization for the payment scheme of the relevant app store.

Emails

If you send us an email with a question or a request, we will store it on our mail server for an indefinite period of time. This includes the following data: your email address, date and time, subject, and the email text which may contain your contact data. Why? So that we can reply to you and offer you excellent support, of course ;)

Our vendors

We are using the services of the following vendors:

- Amazo abank servers an EU-US Privacy ta privacy
- Google ur partne ents to help ur ivacy Shield

Integrati

We have integr ames, which are stored on youtube.com and which can be played in the app. This was implemented using iFrames with YouTube's extended data privacy mode activated. This is why YouTube will not store any of your data initially. If you play a video, however, a connection will be established with YouTube and Google's advertising network DoubleClick and a data transfer will take place on which we have no influence. YouTube stores the data and creates user profiles for market research and advertising purposes. They also use the profiles in order to design the website in a way that it meets the users' demands. They will raise this data irrespective of whether you have a YouTube/Google account or not. If

you have a Google account and are logged in, the data is immediately linked to your account. If you do not want that, you will have to log out before you click on the video. You will find further information regarding the extent to which YouTube collects and processes data as well as the purpose in their data privacy policy: https://www.google.com/intl/en_en/policies/privacy. As already mentioned above, Google is subject to the EU-US Privacy Shield.
