Privacy Policy

We at StepsApp respect your privacy. We are glad to tell you more about which data is accessed, how it is used, and which services we use to enhance your StepsApp experience.

iOS | **Android** | Web

1.0 Data Controller and Owner

StepsApp GmbH
Karmeliterplatz 4c
8010 Graz

only to the health data types you opt in to access. The data read from Google Fit is used solely for visualizing your data within the app. It is not collected or disclosed outside of your local installation of the app except you are participating in leaderboard/challenges parts, then it is shown to other users.

Certain features of our app—such as the Leaderboard and Challenges—require users to create an account. When you register, we collect and store your email address (for login, communication, and account recovery), password (securely hashed for authentication) and/or apple/google sign-in data, username (used in public or social features like the Leaderboard - can be the real full name in case of apple/google sign-in), your steps goal (e.g., daily step target), steps data (to enable features like streaks, Challenges, and Leaderboards), newsletter consent (your opt-in choice for promotional emails), locale and country information (to tailor the app experience, including language and region-specific features), your preferred user language (to deliver the app interface and communications in the correct language), age (to provide age-appropriate features and content), gender (to personalize fitness recommendations), weight (to calculate accurate calorie burn estimates), and height (to calculate accurate calorie burn estimates and stride length). All text messages are stored in server-side encrypted form. We use this information solely to provide, maintain, and improve our services, and we do not share your steps data with third parties.

2.2 Challenges

If you opt in to participate in one of our challenges, you agree that your step count (aggregated hourly) will be securely uploaded to our servers. All data is transmitted in encrypted form and remains encrypted at rest. You can opt out at any time by disabling the Leaderboard/Challenge feature in the App Settings. Additionally, you can contact us to request complete removal of your data from our servers, or you can delete your user account from your profile within the app. We do not share any data with third parties or partners.

you to access or store activity data on Android devices. If you choose to have StepsApp integrate with Health Connect, the app will have access only to the health data types you opt-in to access. The data read from Health Connect is used solely for visualizing your data within the app. It is not collected or disclosed outside of

3.0 How we try to make StepsApp even better

We use analytics services as described in Sections 3.1, 3.2 and 3.3 of this Privacy Policy that help us understand how StepsApp is being used. The processing of your personal data takes place in compliance with the General Data Protection Regulation (“GDPR”). We do not share any personal or Apple Health Kit data.

Usage Information
We collect information about your activity on our services, for instance how you use them (such as frequency, duration of usage, app crashes, features you've been using, advertising that you click on).

Device information
We collect information from and about the device(s) you use to access our services, including:

- hardware and software information such as IP address, device ID and type, device-specific and apps settings and characteristics, app crashes, app version, app name, type of user (pro/free), advertising IDs (such as Google's AdvertisingID, which is randomly generated number that you can reset by going into your device's settings), browser type, version and language, operating system, time zones, identifiers associated with cookies or other technologies that may uniquely identify your device or browser (e.g., GAID which is only used for marketing purposes).
- installation ID that identifies a unique installation within our app ecosystem for company internal tracking and features, enabling features like targeted push notifications, cross-app communication within our suite, and identification of

and identify areas for improvement to enhance the user experience.
Google Analytics Privacy
Firebase Privacy

The only situation we may get access to your personal identifiable information (PII) is when you personally decide to email us your feedback or to provide us with a bug report. The PII we may get from you in that situation are strictly limited to your name, email address and the contents of your response only. In above situation, we guarantee that your PII will only be used for contacting you and improving our services. We will never use such information (e.g. your name and email address) for any other purposes, such as to further market our products, or to disclose your personal information to a third party for commercial gains.

3.3 Ads

StepsApp displays ads within our app through a third party ad network (Gravite). These ads are served by this third-party ad networks. StepsApp Pro members are not shown any ads. You can enable and disable personalized ads within our app at any time. Personalized ads are by default disabled for residents of the European Union, Switzerland and United Kingdom.
https://www.gravite.net/data-privacy

3.4 Meta and Google Ads

For some of our products, we compare limited user data with Meta Ads and Google Ads users who click on our ads on that platform. We do this in order to measure how successful our app install campaigns are on that platform. Further information on how Meta and Google processes personal data, including the legal basis Meta and Google relies on and the ways to exercise your data subject rights with Meta

version, and the state of the application at the time of the crash) will be sent to the servers of Sentry.
https://sentry.io/legal/privacy/3.0.0/in-app/

As described in Sections 3.0 of this Privacy Policy, we sometimes work with third parties to deliver ads or offers. Sometimes we or these third parties do so through a mobile "SDK." The SDK is a bit of computer code that app developers can include in their apps to enable data to be collected and ads to be shown. We may use this and similar technology to deliver certain advertising through mobile applications and browsers based on data associated with your mobile device, and we may work with third parties who likewise embed their SDKs into our services, for third party advertising. If you'd like to opt-out from having ads tailored to you in this way on your mobile device, please follow the instructions below.

If you wish to opt out of interest-based cross-application tracking through your mobile device, you can do so through your device "settings", as follows (but please note that the below is for informational purposes only and Apple, Google, or other device platforms may change the manner in which their "opt out" settings work at any time): Please note that if you opt out through these settings, you will continue to receive advertising after you opt-out, but it may not be tailored to your interests. For instance, that advertising may be based on your real-time or "contextual" application usage or general location inferred from IP address.

4.1 Opting out on Android Devices

If you have an Android device and would like to opt out of mobile interest-based or "cross-app" advertising, you may do this as follows: Open the Settings app on your device -> Go to “Google” -> Select Ads -> Opt out of interest-based ads

More information on our use of cookies on our websites can be found in our Cookie Policy.

media or blogging platforms we utilize have their own privacy policies which explain how the third parties that provide them may collect, use and protect your information (e.g., if you establish an account with such platform providers directly). By using social features, you agree to those third parties' privacy policies and terms of use.

or other similar communication or messaging features or services, such information may be made publicly available. For security purposes, please do not include any password, social security number, payment card or other sensitive information via these features. We have the right, but not the obligation to monitor messages and communications between and among users for security and training purposes. We may, but are not obligated to, remove any content we deem inappropriate.

6.0 Data Retention

We retain different types of data for different periods based on their purpose and legal requirements:

- **System logs:** We retain system logs for a maximum of 60 days for operational purposes, security monitoring, and troubleshooting.
- **Customer data:** We retain customer data (including user account information, activity data, and app usage information) for 2 years after your last interaction with our services. This allows us to provide continuity of service if you return to using our app.

After these retention periods, data is securely deleted from our systems. You can request deletion of your data at any time by contacting us at info@steps.app or by deleting your account through the app.

7.0 Children's Privacy

Our services are intended for general audiences over the age of 13 years old (or over
